

## Pulp Clamps

Pulp Clamps - There is a variety of forklift attachments accessible so as to make the devices much more helpful. A snowplow attachment can be mounted to the front part of the lift truck. A scoop bucket could be useful if the task requires transferring sand, gravel, soil or snow. A double block handler allows the forklift operator to pick up 2 loads and then stack them side-by-side. Many of these attachments are extremely ideal for light to medium tasks.

One more lift truck attachment is the package lift clamp, that can carry and transfer really heavy pallets. Moreover, pallet crane forks could be utilized so as to carry and transfer pallets with an overhead crane. A drum clamp attachment is helpful for transferring very heavy drums from place to place without having to use a pallet. Forklift mounted hoppers allow materials to be transferred and dumped with out having to handle it manually. These hoppers when the bumper is released are self dumping.

Available accessories now include attachments which permit a lift truck to carry out the job of a commercial broom or mop. These specific accessories are often used cleaning parking areas, storehouse flooring, and boat docks. Lift truck mounted platforms come outfitted with twin entry doors and could be hooked up to transport employees from one locale to another. The mounted platform attachment is nice for reaching places that are hard to access, especially when you have merchandise or supplies stored in out of the way areas or way up high.

Attachments can be a very helpful piece of equipment when installed onto a forklift, changing a regular lift truck into a mobile crane unit. It is most helpful when moving unsteady or difficult loads. This accessory could either be telescopic, mounted on the carriage itself, or be connected or even lift truck mounted.
